A Large Brass Table Top Telescope by William Harris & Co

Price

Sold**Item Reference: SA401100****Date of manufacture: 19th Century**

Description

A Large Brass Table Top Telescope by William Harris & Co. A very large antique brass astronomical telescope by William Harris & Co 50 Holborn London. William Harris worked at this address from 1816-1839, which helps date the telescope to the first third of the 19th century. The telescope stands on brass tripod and has an easy 360 swivel, it has 3 piece brass lens cover and measures approx 57" long extended, it stands around 25" tall at the centre, it has a 3.5" lens with adjustable stays to set the viewing angle, the second eye piece is 1" in diameter. This is rare and magnificent piece, the telescope is in very good condition, the brass is naturally patinated and has not been re lacquered. The view through the lens is good, this handsome instrument makes a very imposing display, but is also a practical, usable telescope from a very reputable manufacturer. TSR188 We Give Free Delivery to Mainland England & Wales, to see all of our current stock please visit our web site at www.elmgarden.co.uk. Delivery times vary according to your location. We only operate an online store and regrettably viewing in person is not an option. In the unlikely event you wish to return an item ...
