Antique silver half hunter pocket watch and chain

Price

Sold

Item Reference: SA408323

Date of manufacture: 1910

Description

An antique silver half hunter pocket watch and chain. The watch has a stem-winding movement which is working nicely. The movement is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is 935 silver, so slightly purer than standard sterling silver, and there are Swiss hallmarks inside both of the case backs and also the front cover. The front cover has blue enamel Roman numerals surrounding a small lens. The winding crown pushes in to release the catch for the front cover, and then it can be opened with your fingernail. The inner lens is in good condition. The white enamel dial is in very nice condition, and it has blued steel hands (initially set by way of the pin set mechanism), a subsidiary seconds dial and an outer minute track. The watch comes with an ornate Edwardian albert which measures 29cm long including the T-bar and the clasp. PRICE INCLUDES WORLDWIDE POSTAGE
