

SA437574

A 1930s Omega stem winding pocket watch

Price

Sold

Item Reference: SA437574

Date of manufacture: 1930

Description

A 1930s Omega pocket watch. The watch has a stem-winding movement, calibre 40.6L T2 15P, which is working nicely. The movement is signed with the Omega name, and it has the serial number 8109311 which dates it back to around 1935/36. The movement is protected by an inner hinged cover. The watch measures 49mm diameter excluding the winding stem and the loop. The case has the early Omega logo inside the hinged case back. There is some unevenness to the case back but other than that, the case is in good condition. The lens is plastic and is in nice condition. The white enamel dial is signed Omega. The dial has a very faint hairline crack between 9 & 10 o'clock and the centre although hardly noticeable to the naked eye and an old repair to the outer edge between 3 & 4 o'clock but overall it looks in clean condition to the naked eye. The watch has its original blued steel hands. The watch comes in a new presentation box. Price includes worldwide postage.
