Dimensions

Height = 60 cm (23.6")

Width = 14 cm (5.5")

Depth = 14 cm (5.5")

Description

A pair of tall and very heavy Corinthian column lamps dating from around 1920-1930 and rewired to UK specifications. Both are in very good condition. They have not been professionally polished, just lightly polished by hand. The lamps measure 60cm in total in height, and up to where the shade would fit is 57cm. They have a 14cm square base with a felt covering the iron weights inside. They have been rewired to UK specifications by a qualified electrician who used dark flex cable. The lamps are good quality brass and weigh 3.5kgs each. Postage and packing within the UK mainland has been included in the price, and the weight and size of the lamps has been taken into account. For delivery outside the mainland or abroad, please contact us for a quote for delivery. They can be viewed by appointment with us in Surrey as we no longer trade through a retail outlet, or alternatively, if the buyer can arrange collection from us in Surrey we will pack them ready for transit and offer a discount on the price.
