Description

Circa 1910-1920 an excellent quality crystal glass lamp that was probably once a small candlestick. It has six original faceted glass drops around the sides and a two tier candle holder at the top. The quality of the glass causes light to bounce around the item making it difficult to photograph. The total height of the lamp is 38cm; the central column measures 27cm, and base is approximately 14cm in diameter. It is in very good condition with no signs of damage or repair and has been rewired to UK specifications and will take a standard lampshade. Postage and packing within the UK mainland is included in the price, and for delivery to remote parts of the UK or abroad, please contact us for a quote.
