Depth = 24 cm (9.4")

Description

A well proportioned Georgian oak longcase clock of small 'cottage' proportions. A golden oak case with the original stepped pediment to the hood. Gilded wooden capitals to the side columns. A decorative arched trunk door. A brass and silvered dial with silvered chapter ring. A date aperture and seconds dial with nicely chased detailing to the dial centre edging. This is distinctive to the maker and seen on other examples of his work. An 8-day duration mechanism striking the hours on a bell. The dial is signed to the chapter ring 'Joseph Atkinson' who worked in Chesterfield in the 18th century. There are some references to the maker in Gateshead but this appears to not be connected. The clock dates to circa 1775. Height 6ft 6 " / 198 cms From Kembery Antique Clocks you can expect a genuine longcase Grandfather clock which has been serviced and sold with 12 months guarantee. We personally deliver and set the clock up to your home in the UK, Worldwide professional packing available.
