Description

Lovely large 19th Century oak storage chest with two drawers, set of raised bracket feet. It has panelled sides and a planked top. The lid is hinged and folds back in the middle to give access to the top part of the chest. Originally it would have hinged at the back and lifted up fully but it was modified a very long time ago and works well as it is now without looking out of place. It is in good condition throughout and is strong and sturdy with a beautiful rich patina. The back is clean and the hinges are strong. The drawers run smoothly and have good quality brass drop handles. There are some old woodworm holes here and there which have been treated as a precaution but they haven't affected the chest structurally or aesthetically. It has been well looked after and maintained and is ready for use. The best description comes from the pictures so please look at them all carefully and if you have any questions please ask.
