Large antique Omega pocket watch with albert

Price

Sold**Item Reference: SA480773****Date of manufacture: 1910**

Description

Large antique Omega pocket watch with albert. The watch has a stem-winding movement which is working nicely. The movement is signed with the Omega name and the serial number 5,226,267 dates it back to the second half of the 1910s. The watch itself measures 57mm diameter excluding the winding stem and the loop, so bigger than the standard 50mm diameter pocket watch. The nickel case has some surface marks from use but overall is good for such an early piece. The case is an early attempt at making a waterproof watch... the bezel unscrews and the movement hinges out the front. However, as with any antique or vintage watch, it should be kept away from water and moisture. The glass lens is in good condition. The signed white enamel dial has four short faint hairlines towards the edge. Blued steel hands, a subsidiary seconds dial and an outer minute track. The watch comes with a single albert, 30cm long including the T-bar and the clasp. The watch and chain will be sent in a new presentation box. Free worldwide shipping
