Depth = 7 cm (2.8")

Description

A mahogany cased compass with paper dial by L. Casella, London. The clinometer scale is printed on the periphery of the compass paper and is calibrated for inches-per yard. The bar needle is jewelled and dampened by a stop pin in the upper surface. The case is closed with two brass hooks and eyes situated on the sides to enable the case to be placed on a flat surface for reading the clinometer. The two brass hinges are let in to the case and pinned. The instrument is in excellent condition. The case is 3" square x 3/4" deep, the glazed aperture measuring 2 1/2" in diameter.
