Description

An antique English silver full hunter pocket watch, 1873. The watch has a key-wound movement which is working nicely. The movement is protected by an inner hinged cover. The watch itself measures 54mm diameter excluding the stem and the loop. The case is silver and there are hallmarks for Chester 1873. The case is in lovely condition. The bezel and lens hinge upwards which then gives you access to the dial. To initially set the time, the key is inserted to the centre and the hands moved clockwise to the correct time. The enamel dial is in lovely condition. At least one of the hands is a later replacement... one is gold coloured and one is silver. The watch will be sent in a new presentation box.
