Antique silver Omega pocket watch, c1910s

Price

Sold

Item Reference: SA513407

Date of manufacture: 1910

Description

An antique silver Omega pocket watch, c1910s. The watch has an Omega stem-winding movement which is working nicely. As with some early Omega movements, the signature and serial number will be underneath the dial. The movement is protected by an inner hinged cover. The watch itself measures 50mm diameter excluding the winding stem and the loop. The case is silver and there are Swiss hallmarks inside the back covers, with the early Omega stamp inside the back cover. The case is in good condition with just the odd mark, and some rubbing to the engine turned detail on the back of the watch, just from years of use. The watch glass is in good condition. As was so often the case, the white enamel dial has been left blank so the retailer could add their name if required. The dial is in good condition, just one short scratch near the centre, but not too detrimental at all. The watch will be sent in a new presentation box. Free worldwide shipping
