Depth = 14 cm (5.5")

Description

A high quality skeleton clock made by T. GIBBS of STRATFORD UPON AVON. Gibbs was born in Preston on Stour (Glos.) in 1785 and worked in Stratford on Avon from 1828 to 1854. The 8 day, fusee, timepiece movement is mounted on four gilt figures and the whole piece is constructed from the finest quality materials and the highest quality workmanship. The 5" silvered chapter ring has a gilt rope effect surround and is signed with the makers name, as is the movement. An oval, burr walnut base houses the original glass dome. The movement has just been fully serviced by our BHI registered staff and comes with our usual 12mths guarantee. A very fine clock indeed. All cards accepted.
