Depth = 8 cm (3.1")

Description

An 8" ship's bulkhead clock made by HENRY BROWNE & SON LTD. BARKING & LONDON. Henry Browne & son are renowned for the manufacture of compasses, clocks and scientific instruments. They supplied instrumentation for Spitfires, Tiger Moths, lifeboats etc and in more recent years, instrumentation for Concorde. Their trademark is "SESTREL". This clock has a chromed body with a white dial and black Roman numerals. Finely cut black hands and a subsidiary seconds dial. There is a "Fast-Slow" adjuster to the top of the dial and it is clearly signed "Henry Browne & Son Ltd. Barking & London". Also "Sestrel" Trade Mark. "Made in England". The movement has just been serviced by our BHI registered staff and carries our usual 12mths guarantee. There are some minor losses to the chromework on the sides as may be expected on a clock of this age but it is not considered that they detract from the overall appearance. All cards accepted.
