Description

William IV mahogany console hall table. Here you can purchase this William IV mahogany console hall table. This fabulous table is rich in colour as well as of high quality. The cabinetmaker took a lot of care and attention when selecting the timber on this job. It is obvious that he did not just pick up the first piece of mahogany that was to hand. There is a life and stripe to the grain that makes this so good to the eye. The top has a moulding around the edge and below the top is an oak lined drawer of full width. The front legs are shaped and carved with flattened acanthus leaf and scrolls. The square back legs join the shaped platform base, which also joins to the front legs. This console hall table finishes on small turned mahogany bun feet to the front. Imagine how special this will look in situation in your hall way. It is normally the first thing a visitor will see as they arrive, and so having something special in place always gives a great first impression. This console hall table is of a great size that makes it suitable for most if not all homes, also it has the practicality of good storage in the full width drawer as well as having the platform base.
