

SA52258

18TH CENTURY DUTCH WALNUT & OAK CHEST C.1780

Price

Sold**Item Reference: SA52258****Date of manufacture: 1750**

Description

This stunning & finest quality chest was made in around 1780. The walnut quarter veneered oversailing top above three long drawers and a lower cushion moulded drawer. The chest retains its original gilded solid brass handles and escutcheons with rams masks and swags. The carcase is oak with a thickly cut full oak lining to the heavy drawers. All of the drawers open and close whisper smooth with deep shaped drawer front and clean robust oak lined interiors. In exceptional original condition and having a most fabulous colour and natural patina. Of small practical proportions, the chest is in absolutely superb original condition with no repairs or restoration and no significant dings, dents or marks. There are some old worm holes underneath the chest but these are long since treated and dead and we guarantee the chest to be worm free. The stump feet are original also, hexagonal and squat. The whole of superb colour and patination, the walnut beautifully matched throughout and in excellent condition. The triple serpentine top crossbanded to front and sides and the canted corners spreading into wide faced knees and shaped apron - all lovely and desirable details on a piece ...
