Description

Fully serviced with a 12 month warranty. This is a very fine example of a gents classic wristwatch made by the world renowned premier Swiss maker Omega. The watch is the calibre 501 fully automatic 19 jewel movement. This watch is unusual in as much as it doesn't have the normal serial number, instead it has R15523 which means this was a prototype or pre production model. Also it has a matt finish steel case made by Denison which again is quite unusual. The two tone dial is quite superb having been fully restored. It has the Omega symbol on the winding crown and a genuine Omega buckle. A new glass has been fitted and the case has been professionally polished so it is in superb condition. As you would expect the watch is fully marked on the dial, movement and case. You have a choice of colour straps, just let us know which you prefer. Omega are one of the most exclusive watchmakers in the world and this watch certainly has that understated elegance that whispers class. The watch case measures 34mm in diameter not including the crown. Overall this watch is in outstanding condition and highly sought after by Omega collectors indeed it looks as if it was rarely ...
