Price

Sold**Item Reference: SA532287****Date of manufacture: 18th Century**

Dimensions

Height = 210 cm (82.7")

Description

An excellent early 18th century London longcase clock of unusual small size. The 8 day duration 5 pillar movement with the early form of inside countwheel striking and a recoil anchor escapement. The full brass dial has a separate silvered brass chapter ring featuring Roman and Arabic numerals and with half hour engravings. Also with spandrels to each corner and arch, a matted centre, seconds dial, a square date aperture and original blued steel hands. The makers name and place of work is engraved to the arch on a silvered brass convex roundel. The edge of dial is also profusely decorated with wheatear engraving. A feature which was very commonly used on the early longcase clocks. The exceptional walnut veneered case of excellent colour features high quality book-matched walnut veneer to both the trunk door and base panel. Also with typical cross-grained mouldings and cross-banded walnut veneer throughout the case. The base has a typically plain double plinth. The hood is framed with solid walnut pillars and brass Doric capitals to the top and bottom of each pillar. Also with quarter veneered pillars to the rear of the hood and glass viewing panels to the sides. T...
