Dimensions

Height = 18 cm (7.1")

Width = 38 cm (15.0")

Depth = 23 cm (9.1")

Description

Fine example of an early 20th Century Barograph of the highest quality. The Barograph is cased in Mahogany and glass and the lid hinges to access the instrument itself. The workings are brass and the mechanical eight-day clock movement is housed in the drum, fitted with a seven day chart which covers one rotation of the drum. The aneroid barometer mechanism has 7 stacked vacuum capsules and utilises a gate suspension for improved sensitivity. The nib on the end of the long arm moves to record the pressure. On the front of the case is a brass plaque which reads "Tranmere Sailing Club. Isle of Man Race 1927. 2nd Prize. Class 'A'. Won by 'Iomhar'". The case measures approximately 15" (38cm) wide by 9" (23cm) deep and 7" (18cm) tall. The drum has a diameter of 4" (10cm). The barograph comes with about 50 charts, enough for about a year of recording. It has its original glass ink bottle recessed into the case which still has a bit of ink in. More charts and ink are readily available to buy online. The clockwork mechanism is in good working order and the barograph appears to be working well. Of course it will however need setting up to the correct pressure when it arrives ...
