Description

A rare opportunity to acquire a unique cathedral-arched bracket clock that is in lovely original condition. The architectural oak case is beautifully constructed from the finest quality oak and is finished in a light golden oak colour. (Pictures 2 & 3 give the clearest indication of it's true colour). It contrasts beautifully with the 6" silvered dial that has a cast brass bezel and thick bevelled glass. To the sides are brass lancet sound frets with blue cotton background that replicate cathedral style windows. The 8 day, 3 train movement has just been fully overhauled by our BHI registered staff. It strikes the quarters on 8 bells and the hours on a seperate gong. A key lockable, sound fretted, rear door. A one-off indeed. All cards accepted.
