

SA548340

1920s Herald stem winding pocket watch

Price

Sold**Item Reference: SA548340****Date of manufacture: 1920**

Description

The watch has a good quality Swiss stem-winding movement, which is working well. The movement is stamped Herald, 15 jewels, Swiss made and is protected by an inner hinged cover. The watch measures 50mm diameter excluding the stem and the loop. The gold plated case was made by the case maker Aaron Dennison, a prolific manufacturer who supplied various watch manufacturers with cases. The case has some surface marking to the back and some unevenness around the back hinge. The watch glass is in nice condition. The white enamel dial has a faint hairline crack between 10 o'clock and the centre although barely visible even though a magnifying loupe. Original blued steel hands, a subsidiary seconds dial and an outer minute track. The watch will be sent in a new presentation box.
