

SA549781

Antique silver Omega pocket watch and chain

Price

Sold**Item Reference: SA549781****Date of manufacture: 1910**

Description

The watch has a stem-winding movement, with whiplash regulator, which is working nicely. The movement is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is 900 silver and there are Continental hallmarks inside both of the case backs, together with an early Omega mark. The case has some general fairly light marking, nothing too serious. The acrylic lens is in good condition. The white enamel dial has beautifully shaped blued steel hands, a subsidiary seconds dial and an outer minute track. There is a scratch to the dial, by number 10, and a couple of faint hairline cracks. The watch comes with a silver single albert, 33cm long including the T-bar and the clasp. There is also a shorter chain which has three Victorian threepenny bits attached for decoration. The chain and attachments weigh 47g. The watch and chain will be sent in a new presentation box.
