

SA554931

Antique pin-set Swiss pocket watch and chain, circa 1910s

Price

Sold

Item Reference: SA554931

Date of manufacture: 1910

Description

The watch has a Swiss $\frac{3}{4}$ plate stem-wound movement which is working nicely. The movement is protected by an inner hinged cover – there is some scratching to this inner cover. The watch itself measures 50mm diameter excluding the winding stem and the loop. The case is nickel and overall is in good condition for a piece of its age with one fairly small “ding” to the back and light surface marks, nothing serious at all. The watch glass has some small marks and a mark left by the original lens size sticker but you have to look quite carefully to see it. The dial is in lovely condition and has pin-set blued steel hands, a subsidiary seconds dial and an outer minute track. The watch comes with a double albert with each chain measuring 20cm long including the T-bar and the clasp. The watch and chain will be sent in a new presentation box. Free worldwide shipping
