Width = 37 cm (14.6")

Depth = 17 cm (6.7")

Description

Lovely original 12" fusee dial clock with a convex dial and glass, circa 1875 - 81 The clock is by James Edwards of London and is a super quality movement, has been fully serviced and is running very well, keeps excellent time. The case itself is a slightly paler mahogany than the norm, so this could be useful if matching in with other paler furniture. The clock has an 8 day movement, very clean, tip top condition! Measuring: 14 1/2" or 37cm full diameter 12" or 31cm brass dial diameter 7" or 17cm maximum depth to the front of the convex glass Very easy clock to live with, great time keeping, the winder has a "stop" so you cannot damage the movement when winding it up. Delivery to most England, Wales and Scotland addresses at £55, but please send me your postcode if you are a bit remote or coastal as it could be more...or you are very welcome to collect from me in Uppingham, Rutland
