Description

1930s Urania Watch Co pocket watch. The watch has a 17-jewel Swiss hand-winding movement which is working nicely. At some point in its life, the swan neck element of the regulator has been removed leaving a conventional regulator. The watch measures 50mm diameter excluding the winding stem and the loop. The case is gold filled and it has very attractive patterned detail. The case is in lovely condition. The lens is in good condition. The watch has a double sunk dial and an outer minute track. There is a hairline crack running between 8 and 10 but it is fairly faint. The watch will be sent in a new presentation box. Free worldwide shipping
