Depth = 10 cm (3.9")

Description

The movement is the rare calibre 343 chronometer bumper automatic, only 5000 of these were ever made and vast majority of them were put into stainless steel cases. To find one in an 18ct Rose gold case is very unusual. It is without doubt one of the earliest and rarest Seamasters. Everything about this watch is original, the dial has not been restored or retouched in any way. The early "flatfoot" Omega symbol is on the crown, it has a genuine Omega buckle and it is fully marked Omega on the dial, movement and case as you would expect. The watch case measures 34mm in diameter not including the crown. Omega are one of the most exclusive watchmakers in the world and this watch certainly has that understated elegance that whispers class. Overall this watch is in outstanding original condition and highly sought after by Omega collectors, this is the first example we have ever seen in rose gold. The watch has been fully serviced and is guaranteed to be a genuine Omega in all respects. It has been professionally overhauled, the process is highly detailed and meticulous. It is stripped down to its component parts and each part is examined under a microscope for sign...

Internal Ref: OMEGA SEAMASTER
