Description

1960s Athena Locomotive pocket watch. The watch has an 15-jewel Unitas stem-winding movement which is working nicely. The movement is protected by an inner cover with various medals. The watch measures 50.3mm diameter excluding the winding stem and the loop. The case is chrome plated and is in good condition, just the odd minor mark, nothing serious at all. The back of the watch has a raised image of a locomotive. The glass lens is in nice condition. The signed dial is in nice condition with only the odd minor mark, it has original hands, a subsidiary seconds dial and an outer minute track with red 5 minute markers. The watch will be sent in a new presentation box. Price includes worldwide postage
