Date of manufacture: 1880

Dimensions

Height = 34 cm (13.4")

Width = 27 cm (10.6")

Depth = 15 cm (5.9")

Description

An attractive 'trunk dial' timepiece with a fine but substantial fusee movement and heavy pendulum. The case in mahogany and of good colour has one lower convex door held with a lock and key and one side door held with a traditional latch. The fully restored 8 inch dial shows the name Williamson and Horological (shortened) Engineer. Coventry. The blue steel hands and cast brass collet to the centre. This clock most likely dates to around 1870-80 and retains the two fixing points either side of the case. To fully appreciate this clock you must come and see it next to a full size examples. There is a Williamson of Coventry listed working at 1880 in the Book-Watch and Clock makers of the world. Vol 2.

Internal Ref: Williamson
