

SA609745

1930s Helvetia doctor's watch

Price

Sold**Item Reference: SA609745****Date of manufacture: 1930**

Description

1930s Helvetia doctor's watch. The watch has a Swiss 15-jewel hand-winding movement which is working nicely. The watch measures 20mm wide excluding the winding crown and 31mm high excluding the lugs so although originally designed to be a man's watch, it is quite small by today's standards and would suit a slimmer wrist. The case is chrome plated and there is some general surface marking but overall the condition is very acceptable for a 1930s piece. The lens is in good condition. The signed dial is in its original finish with original hands. There is some marking but it is still easy to read the time. A new leather strap has been fitted. The watch will be sent in a new presentation box.
