Item Reference: SA609822

Date of manufacture: 19th Century

Dimensions

Height = 3.5 cm (1.4")

Width = 16 cm (6.3")

Depth = 3.5 cm (1.4")

Description

Good example of a small high quality telescope dating from the late 19th century. It is a powerful three draw telescope with a mahogany covered centre and brass tubes. It also has an extendable sun shade and comes with a protective brass end cap. The condition of the telescope is very good for its age. It is fully functional with undamaged lenses. The lenses are generally clean and they produce a clear and crisp image, although I expect they would probably benefit from a clean. The tubes have some minor signs of use and age and the wood has some general scuffs and marks but nothing detrimental. The draws have a smooth but firm action and the brass has been cleaned and lightly polished. Closed Length : 6 1/4" (16cm) Extended Length : 18 1/2" (47cm) Front Lens Diameter : 1 1/4" (3.5cm) The best description comes from the photos so please look at them all carefully and if you have any questions please ask. Nationwide delivery £5.
