Sold

Item Reference: SA624263

Date of manufacture: 1910

Description

Antique silver Omega pocket watch & chain, c1910s. The watch has a stem-winding movement which is working nicely. The movement is not visibly signed but is identifiable from the plate shapes. The movement is protected by an inner hinged cover which has a slight indentation. The watch measures 47.6mm diameter excluding the winding stem and the loop. The case is 935 silver, so slightly purer than sterling silver, and there are Continental hallmarks inside both of the case backs. The case has light surface marking and some mild bruising / wear to the back but overall it is in nice condition for a 1910s piece. The acrylic lens is in nice condition. The enamel dial has blued steel hands, a sunken subsidiary seconds dial and an outer minute track. The dial is in nice condition. The watch comes with an antique single sterling silver chain with tassel fob. The chain has graduated links and measures 24 cm long including the T bar and clasp. The chain and fob weigh 29.4 grams. The watch and chain will be sent in a new presentation box.
