Description

Weighing in at nearly 1.5 kilos this is not only an impressive looking clock but deceptively heavy when you handle it. Although there's no makers name there is an undeniable quality to this clock and would hazard a guess it's probably German in origin. Dating to the 1930's and running on a 8 day movement this handsome mantle clock looks very impressive and having been recently fully serviced works perfectly. Constructed from Brass and Steel.
