Description

Fully serviced with a 12 month warranty. This is an incredibly rare solid 18ct gold Omega mens vintage chronograph. Everything about this watch is completely original, the dial has not been restored or retouched in any way. This is a rare 18ct three register chronograph with the legendary calibre 321 movement, the same movement that was used in the Gemini and Apollo Astronaut watches. The movement is considered to be the finest chronograph movement ever produced and was chosen by NASA over all other makers. It has been fully and professionally overhauled and everything works exactly as it did the day it left the factory. The model reference number is BA 101.010 The Omega symbol is on the crown and it comes with a genuine solid 9ct gold Omega buckle dated to 1963 so they have probably been together its whole life, it is fully marked Omega on the dial, movement and case as you would expect. The watch case measures 35mm in diameter not including the crown or pushers. It comes with its original box and we can fit any style or colour of strap, we keep most items in stock. Overall this watch is in outstanding original condition, a rare find with its original box and ...

Internal Ref: omega 321
