Description

An impressive pair of antique dumbbells dating from the early part of the 20th century. These tactile exercise aids are rare for being oversize, each being 30.5cms from end to end, compared to the more commonly-found pairs typically measuring only 22.5cms. They have immense character and charm and would display beautifully as an unusual work of art in any room in the house. English, c.1910. . . .
