Description

A well painted tin-glazed and attractive Delft charger, c.1760, probably Lambeth. As is usual with delftware there are minor frittings to the rim; a hair-crack running around the bowl has been secured with handmade rivets. This was a skilled task and shows that at the time of the repair the charger was highly valued. 13.5 inches in diameter. PROVENANCE: Yorkshire private collection for the last 45 years.
