Description

Antique silver pocket watch, 1913. The watch has a stem-winding movement which is working nicely. The movement is protected by an inner hinged cover which has some unevenness. The watch measures 49mm diameter excluding the winding stem and the loop. The case, including the inner cover, is silver and there are hallmarks for London 1913. The front of the case is in good condition, the hinged case back has some unevenness. The engine turned detail to the back of the watch is still nice and crisp and there is a small vacant cartouche to the centre. The watch glass is in lovely condition. The enamel dial has some hairline cracks, mainly between 10 and 11, but they are faint. Original blued steel hands, a subsidiary seconds dial and an outer minute track. The watch will be sent in a new presentation box.
