Description

Circa 1910-1920 a fine quality Pullman lamp with an on/off switch underneath. It has the registered mark: RD 267925 clearly stamped just under the base of the column - see photos 2 and 6. Pullman lamps were used a lot on ships and railways during the early 20th C. The lamp measures 33cm in height and the widest part across the feet is approximately 19cm. It is unwired and a good electrician could utilise the original on/off switch at the base. Postage and packing is included in the price for the UK mainland only and for remote areas or abroad, please contact us for a delivery quote.
