Item Reference: SA703688

Date of manufacture: 1910

Dimensions

Height = 7 cm (2.8")

Width = 5 cm (2.0")

Depth = 1 cm (0.4")

Description

Offered for sale is a beautiful Elgin full hunter with Masonic symbols dial. The movement is a high quality grade 337 model 6. This is a 3 finger bridge model, nickel with gilt script, screw set train jewels for a total of 17 ruby and sapphire jewels, and with a moseley micro regulator. At manufacture in 1911 this was adjusted 5 ways to give remarkable accuracy and reliability. Today it runs strong and keeps good time to within a minute or so per day, good for an antique watch. The watch is pendant wound and set with both functions operating well. This high quality movement housed in an equally good 25 year gold filled case (the 25 year being an indicator of thickness of gold ranging from 5 year to 30 year, but I have never come across better than 25). This is a slim full hunter by Keysone watch case co. hinged front and rear with an internal hinged dust cover. All of the hinges straight and all of the covers close square and tight. There are no visible dents, dings or heavy scratches on the case with just light surface scratching to betray age and use. The pendant crown and bow all good with no noticeable wear. An excellent case! The single sunk enamel dial heavily decorated with Masonic symbols.

Internal Ref: SB
