Depth = 42 cm (16.5")

Description

For sale, a rare Edwardian New Variable Primary Discharge Coil by Harry W Cox & Co limited. This enormous example is comprised of a mahogany base with a two section coil measuring 65cms across with an interruptor at the side in order to create the high voltage required. Two battery contacts are placed to the back of the interruptor and various connection points are placed in front and in the centre of the base. The power switch is placed at the front right and the makers ivory plate remains at the centre, stating: "Harry W Cox & Co Ltd, Actual Makers of X-Ray & Electric Therapeutic Apparatus, 47 Gray's Inn Road, London". The base measures 79cms in length and 42cms in depth. An Edwardian Catalogue provides the following description: "This coil has been specifically designed and is so constructed that the primary can be connected in ten different ways, thus enabling the operator to select whichever method gives him best results, according to the interruptor and the current employed. It is fitted with a condenser and platinum contact breaker and is in every respect similar to the Cox's Heavy Discharge Base Coil with the exception of the primary, as stated above." In r...
