Depth = 26 cm (10.2")

Description

For sale, a rare Edwardian Portable Heavy Discharge Coil by Harry W Cox & Co limited. This rare example is comprised of a mahogany case with a hidden coil and an interruptor, power seithc and connection points accessible at the side of the box by means of a hinged flap. The discharging rods are attached to the underside of the lid for transit and are placed at connecting points above the coil when use is required. An ivorine plate remains at the centre of the lid, stating: "Harry W Cox & Co Ltd, Actual Makers of X-Ray & Electric Therapeutic Apparatus, 9,10 & 11 Cursitor St, Chancery Lane, England". The box measures 65cms in length, 26cms in depth and 30cms in height and has brass carrying handles wither side. An Edwardian Catalogue provides the following description: "We were the pioneers of portable outfits, and although many professional men continue to give preference to the ordinary form of coil, we venture to predict that the portable pattern will eventually come into most favour, for the following reasons: The portable coil, if properly constructed, is in every respect as powerful and effective as the other. The proviso is necessary, because as our experiments...
