Dimensions

Height = 39.4 cm (15.5")

Width = 69.8 cm (27.5")

Depth = 76.2 cm (30.0")

Description

A fabulous and impressively sized aluminium model of a DC-7 plane which was built by the Douglas Aircraft Company from 1953 to 1958. It was the last major piston engine-powered transport made by Douglas, being developed shortly after the earliest jet airliner—the de Havilland Comet—entered service and only a few years before the jet-powered Douglas DC-8 first flew. This is an over-sized model with a 30" wingspan. The body of the plane shows normal casting scarring normal for these models and the stand has been newly custom made to display this masterpiece. An excellent piece of mid-century art perfect for the office. Excellent condition measuring 27 1/2" in length x 30" wingspan x 15 1/2" tall. Item: 41951 FREE Worldwide Registered Airmail Directly From London, England

Internal Ref: 41951
