Item Reference: SA727471

Date of manufacture: 1940

Description

Gents Omega 26.5 SOB wrist watch, c1940. The watch has a 15-jewel hand-winding movement, calibre 26.5 SOB, which is working nicely. The movement is fully signed and the serial number 9,203,799 dates it back to around 1940. You will notice two empty retaining screw holes within the movement, these screws are not required because the watch has a retaining ring which holds the movement in position. The watch measures 30mm diameter excluding the winding crown and the lugs. The case is the 'waterproof' stainless steel model but we would strongly advise keeping it away from water and moisture as it will not now be waterproof. The ends of the lugs have been braised to compensate for wear to the tips. There is light marking to the case but overall very acceptable for a piece of its age. The lens is in good condition. The signed dial has darkened with age and there is some raised pale freckling. Blued steel hands, a subsidiary seconds dial and an outer minute track. A later leather strap has been fitted. The watch comes in a new presentation box.
