Description

A rare and very high quality dead beat escapement, maintaining power fusee wall clock. A well carved decorative case to the 12" painted dial with blued steel hands. An 8-day duration timepiece fusee mechanism with dead beat escapement, maintaining power and heavy pendulum. Circa 1845. John Warry of Bristol is recorded in A J Moores' 'The Clockmakers of Bristol' book as working from 1830-1850. He maintained the church clock at St Mary Redcliffe. This example due to it's very high quality mechanism is likely to have ben in a public place and has never had a brass bezel and glass. Width 16 1/2" / 42 cms Depth 6 " / 16 cms. From Kembery Antique Clocks Ltd you can expect a genuine antique wall clock that has been serviced with 12 months guarantee. Please contact us for a personal delivery quote. We are members of The British Watchmakers and Clockmakers Guild.
