Description

This is an antique microscope. An English, brass jug handle scientific instrument by C. Baker of London, dating to the Edwardian period, circa 1910. Attractive and appealing scientific instrument Displays a desirable aged patina Lacquered brass in deep dark hues — some wear commensurate with age and use Mahogany carry box shows rich russet hues and benefits from working lock — key present Extendable eyepiece tube over a rack and pinion main focus with additional fine focus Triple revolving nosepiece resides above a square stage with mechanical slide holder The three C. Baker objective lenses with supplied brass canisters resting within a mount Bright plano-concave mirror beneath the slide holder Polished brass trim beams against the dark lacquer of the main body Distinctive form known as the 'jug handle' Baker microscope Engraved for Charles Baker operated from 244 High Holborn, London This example with the initials D.P.H. - Department of Public Health - and serial number 6626 This is a superb antique microscope with high decorative appeal of fascination for those with an interest in scientific instruments. Ideal for the study or desk, delivered polished and ready for...
