Description

Antique silver Omega pocket watch, c1910s. The watch has an Omega stem-winding movement which is working nicely. The movement is protected by an inner hinged cover which has light surface marking. The watch measures 45mm diameter excluding the winding stem and the loop. The case is silver and there are Swiss hallmarks for 935 silver inside both of the case backs, so slightly purer than 925 sterling silver. The inside of the case back has the early Omega logo. The front of the case is in good condition. The case back has some unevenness and some rubbing to the engine turned detail just from where it has sat in a pocket. The acrylic lens is in good condition. The dial has a little discolouration around the centre but otherwise is in good condition. The watch comes in a new presentation box.
