Description

Fully serviced with a 12 month warranty. This is an incredibly rare solid 18ct gold Omega mens vintage chronograph. This is a rare 18ct three register chronograph with the legendary calibre 321 movement, the same movement that was used in the Gemini and Apollo Astronaut watches. The movement is considered to be the finest chronograph movement ever produced and was chosen by NASA over all other makers. The dial is in mint condition having been full restored. It has been fully and professionally overhauled and everything works exactly as it did the day it left the factory. The model reference number is BA 101.010. The Omega symbol is on the crown, it is fully marked Omega on the dial, movement and case as you would expect. The watch case measures 35mm in diameter not including the crown or pushers. It comes with both its original inner and outer boxes. Overall this watch is in outstanding condition, a rare find with its original boxes and highly sought after by Omega collectors. You will probably never see a more original or perfect example of this rare watch. It has been professionally serviced and overhauled the process is highly detailed and meticulous. The...

Internal Ref: omega 321
