Description

This rare sterling silver bangle was designed by Regitze Overgaard and was made in the period, when she and her husband Ulrik Arent Iversen had a studio in Copenhagen, prior to her joining the Georg Jensen company. Pieces from their studio are extremely rare, and this bangle is my first item from this husband and wife team. Good vintage condition, but the bangle has a small dent consistent with age and wear. Bangle is 3cm wide. Inside circumference 19.5 cm. Weight 92.3 g.
