

SA767691

Antique Omega gun metal pocket watch

Price

Sold**Item Reference: SA767691****Date of manufacture: 1910**

Description

Antique Omega gun metal pocket watch. The watch has a stem-winding movement, identified as an Omega, and it is working nicely. The movement is protected by an inner hinged cover. The watch measures 50mm diameter excluding the winding stem and the loop. The case is gun metal, an alloy of copper, tin and zinc which was originally used in gun manufacture but was later replaced by steel. The case has rose gold embellishments which really give it a lift, a very handsome piece. The inside of the case back has the early Omega logo. The glass lens is in lovely condition. The dial looks very good to the naked eye. If viewed through a magnifying glass, there is a short very faint hairline between 3 and 4 o'clock. Original rose gold coloured hands to tie in with the case detailing. The watch comes in a new presentation box.
