Description

In excellent pile, no restoration, here is some very well priced floor covering that will feel great under your feet for many, many years. So called 'Pub Turkey' because the originals were copied by machine made producers who mass produced it for pubs- amongst other venues- where it proved to be very popular. Here is the original, handmade version, around 90 years old, with a warm red ground colour and touches of light blue, navy and pale green. Missing a little from one corner, priced as is. Clean and ready to use.
