Description

Antique Omega pocket watch, c1910s. The watch has a keyless top-wind movement which is working nicely. The movement is signed Omega, and it is also signed on the regulator which is a little more unusual. The movement is protected by an inner dust cover. The watch measures 53mm diameter excluding the winding stem and the loop, so a little larger than a standard pocket watch. The case is nickel and it is in lovely condition, as is the acrylic lens. The signed dial is in lovely condition. Blued steel hands, a subsidiary seconds dial and an outer minute track. The watch comes in a new presentation box.
