Description

Antique silver Omega pocket watch. The watch has a stem-winding movement which is working nicely. The movement is signed with the Omega name and it is all protected by an inner hinged cover which has a sunburst pattern to the inside. The watch measures 48mm diameter excluding the winding stem and the loop. The case is silver and there is a small Continental hallmark inside both of the case backs. It has monogrammed initials to the hinged case back. The signed dial has a couple of hairline cracks through number 4, and some between 9 and 12 but most are very faint. Blued steel hands, a subsidiary seconds dial and outer minute markers. The watch comes in a new presentation box.
